### Seeded Defects

Defect #	Defect	Output before seeding	Output after seeding	suggested correction	Black/White box testing	Severity
1	Doesn't show an upcoming episode if episode is on the current day.	An episode that comes out on the current day shows up as the first upcoming episode if it hasn't been premiered yet.	Episode that comes out on the current day doesn't show up in the list.	Make sure the NextEp function checks the current day and hours and minutes to see if an ep on the same day is upcoming	black box testing	2
2	Will still attempt to post to Twitter if over 140 characters	Would post "I added a lot of shows"	Twitter posting view opens but could be longer than 140 characters and won't post	Check to make sure message is less than 140 characters or post default message	Black box testing	2
3	Add button in show popup will not change to remove	Add button will change text to Remove if a show is added	Add button text will not change regardless	Make sure the JButton object has its text changed	Black box testing	1

	and vice-versa when double clicking on showtimes	through double clicking and vice-versa	s of double clicking on showtimes	when adding/removing a show		
4	Episodes aren't ordered correctly by date and time.	Episodes are ordered in upcoming episode list by date and time.	Episodes are incorrectly ordered.	Add hour and minutes to show times to properly sort them.	Black box testing	2
5	Add button does not change text to Remove when revisiting a previously-added show	Add button will change to Remove button when revisiting a previously-added show	Add button remains as 'Add' when revisiting a previously-added show	Check to see if the show is already in the list; if so, then the button text must be changed to 'Remove'	Black box testing	2
6	Search's components won't resize when the window is resized.	Resizing the search window will resize the list of shows as well as the details button.	Search's components won't resize with window resizing.	Add a component listener to search that runs on componentResized which resizes the components.	Black box testing	2
7	User isn't informed when there are no search results	A message dialog informs the user when no results are found	No dialog message is shown when no results are	If results.size() == 0 then show a dialog that no	Black box testing	3

	found.	when searching.	found.	results were found.		
8	Trying to save your list of shows to a file that already exists doesn't ask if you want to overwrite the file.	A message dialog asks if you'd like to overwrite a file if it already exists when saving your show list.	There is no dialog asking if you'd like to overwrite, but overwrites anyway.	Add a <code>if(file.exists())</code> then ask if the user would like to overwrite when saving.	Black box testing	2
9	Trying to add a show that already exists in the list will work if you do it via loading a file.	Trying to add a show that already exists via loading a file would not work.	Calling load on a file that has a show that already exists will add the show to the list again.	In <code>addShow()</code> , return <code>if(showsAlreadyInList())</code>	Black box testing	2
10	Loading a list of shows when there are already shows in the list doesn't delete the old shows.	Calling load will clear all lists of the shows already in the lists.	Calling load will not clear the lists before adding the shows from the load file.	Before loading a file, clear out shows, times, sortedDates, and dates.	Black box testing	2
11	If no shows are added a null message is sent to	Would receive warning stating no shows have been	Attempts to post message with "null" message	Check to make sure a show has been added	Black box testing	3

	Twitter	added				
12	Clicking Details when no show is selected will not prompt the user to select a show	A message is displayed asking the user to select a show first	A message is displayed saying internet connection has been lost	Add a conditional that will proceed to the show information only if the user has selected a show. If no show is selected, display the proper message	Black box testing	3
13	Can only post to Facebook when only one show is present	Creates new Facebook post for every added show	Displays no shows are added dialog	Create post for each show	Black box testing	1
14	Show description text is not properly being wrapped	Show description text will wrap around, maintaining legibility	Show description will not wrap around, cutting off words	Make sure the description text area has a wrap style set to it	Black box testing	2
15	Removing a show won't remove the upcoming episodes	Removing a show would remove the upcoming episodes correlated to the show.	Removing a show no longer removes the upcoming episodes from the list.	In removeShow() go through the upcoming episodes and remove them if they exist in the	Black box testing	1

				series hashmap.		
16	Event time in .ics file starts at midnight	event time starts at appropriate time	event time will start at midnight every time	check the Date object to make sure its setting the time correctly	Black box testing	1
17	When exporting 3 or more shows to Twitter they do not post properly	Prints the added shows named off one by one in order	Prints the first one twice then reaches the end of the list before printing last show	Examine logic when iterating through list of added shows	Black box testing	2
18	ending time of event in .ics file is at midnight	event time ends at appropriate time	event time ends at midnight	check the date object to make sure its setting it correctly	black box testing	1
19	doesn't save file with .ics extension	saves file with .ics extension	doesn't save file with any extension	check out the file chooser to see what it'd doing	black box testing	2
20	only adds first episode of first show to calendar	adds all episodes of all added shows to the calendar	only adds first episode of first show to calendar	check the loop in the action listener for exporting to iCal	black box testing	1
21	doesn't show error message when trying to export to	displays error	doesn't display error	check if statement logic in the action listener when	black box testing	2

	iCal but no shows have been added			exporting to iCal		
22	No error message if database is attempted to be accessed to find episode details in search results	Displays error that tells user that the database couldn't be reached due to internet issues.	doesn't display error	Have a handler catch the exception if database doesn't connect	black box testing	2
23	When Popup window is resized, the elements don't scale	Elements in Popup are resized when window is resized	Elements aren't resized	Resize elements when window is resized	black box testing	3
24	No error message displayed if database connection fails when loading show page	Error message is displayed stating that database access failed	The program has no response to the user interaction	Send the user an error message when database connection fails	black box testing	2
25	No error message displayed if database connection fails when loading actor page	Error message is displayed stating that database access failed	The program has no response to the user interaction	Send the user an error message when database connection fails	black box testing	2
